

## FREE START UP PBX!

Many small businesses and small business start-up waste money outlaying cash by investing in infrastructure they do not need and or can get for free or an extreme reduced cost. Did you know that for a full hosted Integrated Voice Response (IVR) Phone System with extensions, voice mail, automated assistant, a.k.a PBX, a small business can get this set up with 5 users for free. \$0 cash outlay! \$0 charges for inbound and outbound calling. If your need is over 5 extensions then the monthly cost is \$20 per user with no set up fees!

## IT DEPARTMENT IN A BOX!

Don't buy hardware...lease or subscribe to it! Did you know that for less than \$150.00 a month you can have a Fortune 500 Enterprise IT infrastructure in your business? A File Server with 1 TB of storage that is HIPAA, SOX, and ISO 27001 Security Compliant, a Virtual Private Networking VPN Server for local or remote access to your private network, Cloud Data Back-up and Restoration and Firewall security. No need to buy separate expensive pieces of equipment and pay for maintenance updates. We put money back in your pocket. Let us show you how!

## CAN'T FIND THE SOFTWARE YOU NEED?

Don't ever pay for software with loads of features you do not need and will never use...again! We engineer custom software for FREE. As with all our services, our customers only pay for what they use and with a low monthly fee. Get software designed specifically for your business! We incur all the costs of development. Once the software is ready - you just pay to use it. . \$75-\$167/mo. Typical. \*Requires an SLA.

Counterspherics Labs is a combined software and IT Managed Solutions Provider which specializes in Small Business IT Infrastructure and the development of "right-sized" software and software system appliances i.e. pre-installed software on portable, connected, dedicated, security tightened hardware called micro-systems.

## MULTI-EMERGENCY RESPONSE LINKED EMERGENCY NOTIFICATION NETWORK

(CSL) - Life - we only get one go around. It should be protected every way possible. The founder of Counterspherics Labs spent nearly a decade in federal law enforcement and was witness, as one might expect, to some very bad things. As part of his evolving career path, our CSL founder began a new path in the aerospace industry working on life critical systems. Prior to both of these though, at 18 in 1980 he founded Direct Software Kompany of Claremont California or DiSK with high school friends. Several decades later, it makes sense that these paths would coalesce into the formation of Counterspherics Labs and the creation of MERLENN™.

No stranger to earthquakes, our founder was in the Philippines when the precursor quakes (years before) to the eruption of Mt. Pinatubo shook Angeles City. He was also there when Typhoon Ruby struck the main island of Luzon and during Corey Aquino's EDSA revolution in 1986; and the 1987 assassinations of a friend and other US servicemen. In 1991 he watched as the Andover Kansas tornado hit his community and was involved in rescue operations immediately thereafter.

Columbine in 1999 was the catalyst for development of a full emergency preparedness and management system. The development of MERLENN™ takes a lifetime of real-world human contingency experiences to create an easy to use, affordable, Emergency Preparedness & Management platform for the masses. Families & Business now have a complete EM solution with mass alerting/notification for their employees, staff, students, customers, faculty, patients, caregivers, volunteers, family members, and more. At \$167/month there is no price barrier. That said, a quick look reveals that MERLENN...

### Manages Your Digital Emergency Ops Plans

Keeps your emergency operations plan handy and accessible 24/7/365 keeps you HIPAA, CMS, FEMA, OSHA, SOX, GLBA, & Clery Act compliant.

### Manages Your Training, Drills, Recovery, Mass Notifications, & Situational Awareness Information

Provides real-time communication and direction.

### Geographically, Coordinates, Alerts, Tracks, & Logs

Chronologically tracks multiple simultaneous incidents, actions, regardless of location.

### Manage Emergency Response, Actions, Inventory, Resources, Communication, & Life Accountability

Allows incident servicing though active emergency resourcing.

### View Costs, Incident Analytics, Risks, Geohazards, (Natural), Geothreats (Human) & Checklists

Provides real pertinent graphical information.
